In this complex supply chain, we recognize that fair and ethical procurement activity is an important issue on sustainability. In 2016, we began formulating our own “Group Sourcing Policy” and “Group Sourcing Guidelines”, which specify the human rights, social, environmental, and governance standards to be observed in order to promote socially and environmentally responsible procurement activities. Since then, we have been promoting the conclusion of partnership agreements with production factories through monitoring audits and on-site inspections of factories based on the Group Sourcing Policy.

The disclosure of the supplier list fulfills our corporate responsibility as a company operating in the apparel and textile industry, which is considered to have a high

environmental impact. The disclosure of the supplier list is based on our corporate stance; to fulfill our corporate responsibility as an apparel company, to continue to provide our customers with safe and secure products, and to realize a better society. And this disclosure is also in order to increase the number of companies that agree with our management stance of enhancing corporate value together with our partner companies, as working with the entire supply chain to resolve issues. The Adastria Group, the third largest apparel company on sales basis in Japan, is committed to making the future of the fashion industry sustainable by taking an industry-wide initiative to address social issues that cannot be solved by individual companies alone.
