Singing voice synthesis app "VoiSona" introduces "iOS-Exclusive Voice Libraries"

Purchase and use them right on your iPhone or iPad, from
October 6

- The app and two voice libraries are free; additional voice libraries are a one-time purchase, USD 24.99 -

Techno-Speech, Inc. (headquarters: Higashi-ku, Nagoya; Representative Director: Keiichiro Oura, hereinafter "Techno-Speech") announces that, for the singing voice synthesis app "VoiSona," it will begin offering "iOS-Exclusive Voice Libraries" worldwide on October 6, 2026. These voice libraries can be purchased within the iPhone/iPad version of the app and used directly on iPhone and iPad.

App Store: <https://apps.apple.com/app/voisona/id6478200421>

The promotional banner for the VoiSona app features a dark background with a grid of colorful squares. On the right, a smartphone displays the app's interface, showing a list of voice libraries with character avatars and a 'Buy SELENA' button. The main text on the left reads 'iOS-Exclusive Voice Libraries Available October 6!!'. Below this, a box highlights the price of the iOS-Exclusive Voice Library as 'NEW USD 24.99 / voice library'. To the right, a box compares the PC Voice Library at 'JPY ¥13,200 / voice library'. The banner also includes a note about the price in Japan and a list of features for the iOS version.

VoiSona

iOS-Exclusive Voice Libraries Available October 6!!

Less than $\frac{1}{3}$ the price of the PC version—with the same sound quality.

iOS-Exclusive Voice Library

NEW

USD 24.99

/ voice library

- ✓ iOS devices only
*Linked to your Apple ID. *Cannot be used on Windows/Mac
- ✓ Same sound quality as the PC version
- ✓ 24 voice libraries
*As of October 6, 2026

PC Voice Library (for comparison)

JPY ¥13,200

/ voice library

Usable on up to 3 devices across PC and iOS
Same sound quality as the iOS version
41 voice libraries
*As of October 6, 2026

Buy SELENA

Buy in app (iOS) **\$24.99**
Get some purchases \$34.99

In-app purchases are licensed for iPhone / iPad only.

*Mockup image

[Everything from purchase to use, handled by your Apple Account]

The iPhone/iPad version of "VoiSona" lets you enjoy singing voice synthesis on the iPhone or iPad you already carry, with no PC or DAW required. The app

itself and two voice libraries, "Chis-A" (Japanese) and "Chis-A [tʃiːseɪ]" (Cross-Lingual), are free to use.

"iOS-Exclusive Voice Libraries" can be purchased from within the iPhone/iPad version of VoiSona using your Apple Account. There is no need to register an account or complete a payment procedure on our website: you can buy a voice library and start creating with the same ease as using any app from the App Store. Each "iOS-Exclusive Voice Library" is a one-time purchase with no monthly fee: USD 24.99, which is less than one third of the price of a standard license for PC (13,200 JPY, tax included, on voisona.com). Prices differ by country and region, so please check the App Store for the price in your area.

The iOS price is lower, but the voice libraries themselves are identical to those for the PC version, so you can enjoy the same quality of singing voice on iPhone and iPad as on a PC. You can confirm that quality before you buy, using the feature that lets you try any voice library you have not purchased for 10 seconds. Listen to a range of voice libraries, then pick up the one you like right then and there.

VoiSona for iOS

iOS-Exclusive Voice License Now Available In-App!

Same sound quality as the PC version—
now available in-app for less than **1/3** the price.

*More voices coming soon

VoiSona for iOS — app is free

*Available now on the App Store

*Mockup image

The smartphone screen displays the VoiSona app interface. At the top, it shows a list of voice libraries: 'Chis-A' (Japanese), 'Chis-A [tʃiːseɪ]' (Cross-Lingual), 'Bennett', 'SELENA', 'Ying Can', and 'Ci flower'. Each entry has a character avatar and a 'Buy' button. Below the list, there's a large 'Buy SELENA' button. At the bottom, a banner says 'Buy in app iOS \$24.99 One-time purchase \$24.99'. The background of the app shows a musical score with notes and a frequency spectrum.

"iOS-Exclusive Voice Libraries" will be released simultaneously on the App Store in countries and regions around the world. At launch, 26 titles are available, including the free voice libraries, covering not only Japanese but also English and Chinese.

[Comment from Keiichiro Oura, Representative Director]

Listening to music, making it, and sharing it all happen on the smartphone in our hands today. And yet, enjoying singing voice synthesis has generally meant sitting down at a PC. We prepared a form that is complete on an iPhone or iPad alone because we wanted to set that assumption aside, just once. On the train to school, or lying in bed, you can have a melody you have just thought of sung back to you on the spot. With the same ease as humming to yourself, we want everyone to be able to work with a singing voice, regardless of country, gender, or age.

I would add that the voice libraries for "VoiSona" are built solely from data for which the rights have been properly cleared, such as recordings made with the permission of the rights holders. We do not use data gathered from the internet as training material without permission, nor do we use generative AI models whose training sources cannot be accounted for. An Android version is also in active development.

[About the "iOS-Exclusive Voice Libraries"]

- ✓ Release date: October 6, 2026
- ✓ URL: <https://apps.apple.com/app/voisona/id6478200421>
- ✓ How to purchase: In-app purchase within the iPhone/iPad version of "VoiSona"
- ✓ Price: USD 24.99 per voice library. Prices differ by country and region; please check the App Store.
- ✓ Available regions: Worldwide
- ✓ License is tied to: The Apple Account used for the purchase
- ✓ Lineup: 26 titles (as of October 6, 2026)
 - Free voice libraries: Chis-A (Japanese), Chis-A [tʃiːseɪ] (Cross-Lingual)

- ✓ Notes
 - "iOS-Exclusive Voice Libraries" can only be used on an iPhone or iPad signed in with the Apple Account used for the purchase. They cannot

be used with the Windows or macOS version.

- Family Sharing is not supported.
- An internet connection is required for use.
- Prices differ by country and region. Please check the App Store for the price in your country or region.
- If you would like to use a voice library across all of Windows, macOS, iPhone, and iPad, please purchase a standard license (outright purchase plan or subscription plan) sold on the official website (voisona.com). Standard licenses can still be used on iPhone and iPad, just as before.
- The voice libraries themselves are identical to those for the Windows and macOS versions.
- "iOS-Exclusive Voice Libraries" and standard licenses are separate products. We do not offer a way for a customer who has purchased one to migrate to the other by paying the difference.

[About VoiSona]

"VoiSona" is a singing voice synthesis software that realistically reproduces human singing voices using the latest technology. The name "VoiSona" combines "Voice," meaning sound, and "Persona," meaning personality or charm, reflecting the goal of expressing diverse personalities through voice. The software supports both voice providers and creators, aiming to create a mutually beneficial ecosystem.

Based on the singing voice synthesis technology that Techno-Speech has built up over many years, the software is available on Windows, macOS, iOS, and iPadOS with VSTi/Audio Units support, making it easier to use and capable of meeting professional needs. It comes with a default Japanese voice library called "Chis-A" with a neutral tone. A simple standalone application is also included, so it can be used by those who do not have a DAW that supports VSTi/Audio Units. Audio waveform data output using "VoiSona" and "Chis-A" can, with some exceptions, generally be used free of charge by individuals and corporations alike, for both commercial and non-commercial purposes.

- ✓ Product name: VoiSona
 - ✓ Official website: <https://voisona.com/>
 - ✓ Release date: September 1, 2022
 - ✓ Format: Download
 - ✓ Price: Free for the "VoiSona" main software and the standard Japanese voice library "Chis-A." * Additional voice libraries are available for purchase.
- * Registration on the official website is required.

[System requirements for VoiSona]

- ✓ Supported OS: Windows 11 / Windows 10 (64-bit, 22H2 or later), macOS 11 (Big Sur) to 26 (Tahoe), iOS 17 to 26, iPadOS 17 to 26
- ✓ CPU
 - Windows: Intel/AMD processors (Intel Core i5 (4th Gen) or higher, or equivalent AMD processors recommended.)
 - macOS: Apple Silicon/Intel processors (Apple Silicon or Intel Core i5 (4th Gen) or higher recommended.)
 - iOS/iPadOS: iPhone 12 or later, or iPad (10th generation) or later recommended
- * If processing performance is low, there may be sound skipping during playback. (There is no issue with file output.)
- ✓ Memory: 4GB or more (8GB or more recommended)
- ✓ HDD: At least 1GB of free space for installation
- ✓ Graphics: 1280 x 720 or higher resolution in full color
- ✓ DAW: A DAW that supports VSTi/Audio Units. * In some cases, VoiSona can synchronize the playback position of the DAW. * VoiSona can also be used as a standalone application in an environment without a DAW.
- * Internet connection required for use.

[Company overview]

Techno-Speech aims to enrich people's lives by applying the results of voice-related research and development in various fields such as entertainment, education, and healthcare.

- ✓ Development of voice synthesis and singing synthesis platforms for professional use
- ✓ Support for creating e-learning and on-demand course materials
- ✓ Reproduction of artists' voices, including those who have passed away
- ✓ Applications for games, apps, and web services
- ✓ Virtual concerts with virtual YouTubers
- ✓ Voice-over systems with virtual actors
- ✓ Integration of speech modules into AI and voice interaction systems
- ✓ Flexible reference voice generation for foreign language and singing education
- ✓ Voice devices for patients with ALS, laryngeal cancer, etc.
- ✓ Digital signage for care facilities
