

Financie, Inc. announces deployment on the Polygon Network

~ Adoption of the Polygon Network for the Financie Token (FNCT) ~

Financie, Inc. (Headquartered in Shibuya-ku, Tokyo, CEO: Hironao Kunimitsu, hereinafter referred to as "Financie") announces collaboration with Polygon Labs, a growth and development team for the Polygon protocols. Based on this collaboration, the Polygon Network has been chosen for the deployment of the "Financie Token (FNCT)".

The Polygon protocols are Ethereum scaling solutions help make available scalable, affordable, secure and sustainable blockchain infrastructure for Web3. By utilizing Polygon for the utility delivery portion of the Financie Token (FNCT), Financie is able to provide a more stable service mechanism by reducing transaction processing delays and escalating transaction fees (gas fee).

Financie is the only web3 platformer in Japan that provides comprehensive support for the formation and expansion of the general token ecosystem, including the blockchain-based token-issuing crowdfunding platform FiNANCiE, NFT planning and issuance support, and IEO (*1) support. In the future, by combining Financie Token (FNCT) and Community Token (*2) issued by each community on FiNANCiE, we aim to develop the creator economy that has been closed within the FiNANCiE service into a global ecosystem.

Financie will continue to do various initiatives to expand the creator economy on Polygon.

※1 IEO stands for "Initial Exchange Offering" and is a mechanism whereby crypto assets issued by companies, projects, etc. are vetted by crypto asset exchanges before being sold. In addition to being able to raise funds, tokens make it easy to form and strengthen communities.

※2 Community Token is NOT a crypto asset. It can be used only in FiNANCiE service.

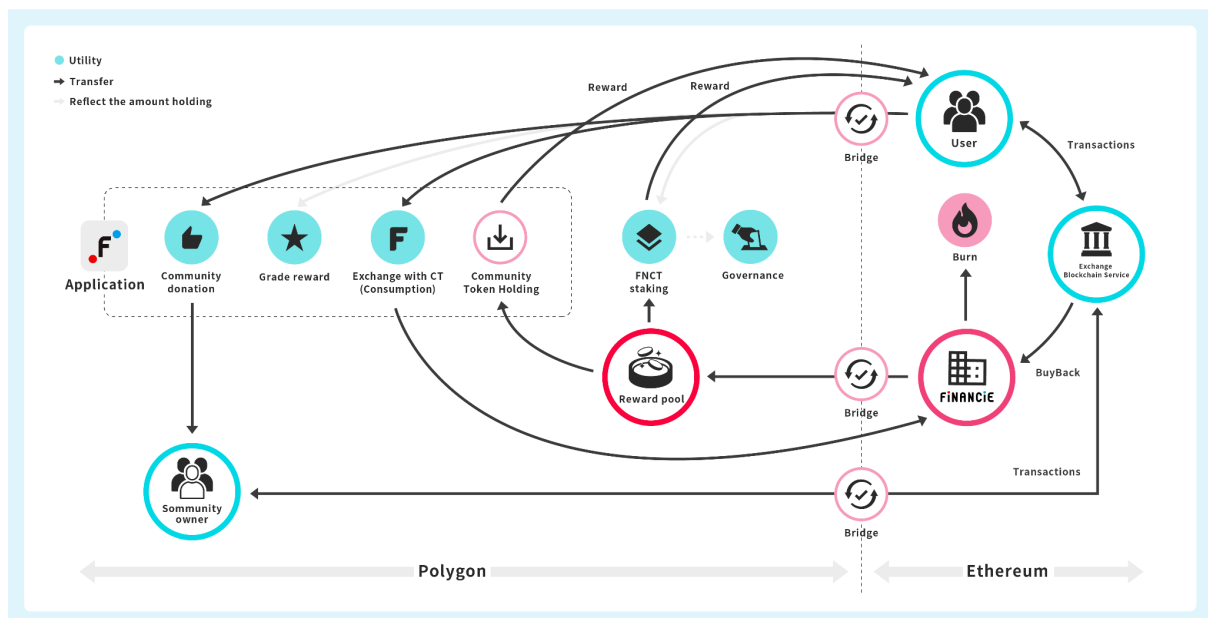

■ About Finance Token (FNCT)

【Summary】

Finance Token (FNCT) is a crypto asset issued on the Ethereum blockchain. Also, we are going to utilize the Polygon Network in response to the recent spike in Ethereum gas prices and transaction congestion. It serves as a platform token that effectively connects Community Token issued and used in "FiNANCiE," a token issuance-based crowdfunding service utilizing the blockchain provided by Finance, Inc. in order to enhance the long-term value of Community Token.

More detailed examples of the utilization of Finance Token (FNCT) include providing rewards to users of FiNANCiE and using it as an incentive for the continued growth of excellent communities on FiNANCiE. In addition, Finance Token (FNCT) allows participating in governance throughout the entire ecosystem of FiNANCiE platform. This contributes to the realization of "user-driven operation".

【Ecosystem】

■ About Polygon Labs:

Polygon Labs develops Ethereum scaling solutions for Polygon protocols. Polygon Labs engages with other ecosystem developers to help make available scalable, affordable, secure and sustainable blockchain infrastructure for Web3. Polygon Labs has initially developed a growing suite

of protocols for developers to gain easy access to major scaling solutions, including layer 2s (zero-knowledge rollups and optimistic rollups), sidechains, hybrid chains, app-specific chains, enterprise chains, and data availability protocols. Scaling solutions that Polygon Labs initially developed have seen widespread adoption with tens of thousands of decentralized apps, unique addresses exceeding unique addresses exceeding 211 million, over 1.12 million smart contracts created and 2.36 billion total transactions processed since inception. The existing Polygon network is home for some of the biggest Web3 projects, such as Aave, Uniswap, and OpenSea, and well-known enterprises, including Robinhood, Stripe and Adobe. Polygon Labs is carbon neutral with the goal of leading Web3 in becoming carbon negative.

If you're an Ethereum Developer, you're already a Polygon developer! Leverage Polygon's fast and secure txns for dApps you develop, get started [here](#).

■About Financie, Inc.

Financie, Inc. is a company developing businesses that support the formation of token-based communities and ecosystems, including the blockchain-based token-issuing crowdfunding service FiNANCiE, the NFT business, and the IEO support business. Currently, we have issued, sold, planned, and operated tokens for over 200 sports teams, entertainment projects, and individuals, and are aiming to establish the only Web3 platform in Japan that supports the formation and expansion of token ecosystems in a single integrated manner.
