

PRESS RELEASE

DeCurret to Start Offering an Android App for Leveraged Trading

DeCurret Inc. (HQ: Chiyoda Ward, Tokyo, President & CEO: Kazuhiro Tokita) is pleased to announce the release of an Android app for leveraged trading (DeCurret App for Cryptocurrency Leveraged Trading) on Monday, January 6, 2020.

■ Key Features

1. High-performance technical charts

The leveraged trading Android app offers multifaceted analysis of the prices of cryptocurrencies in the same manner with the iOS app launched on November 19, 2019.

The landscape mode enables display of charts with longer time span, and users can also zoom in and out of the charts.

In addition to the pricing data, nine indicators signaling price momentum are offered for multifaceted market analysis along with tick charts and time charts for multiple time frames (M1, M5, M30, H1, H4, D1, W1, and MN1) enabling users to analyze market trends in great detail.

<Market Indicators>

Overlays	Simple moving average, Bollinger Bands, exponentially smoothed moving averages, and Ichimoku clouds (Ichimoku Kinko Hyo)
Oscillators	Stochastics oscillators, MACD, RCI, RSI, and DMI/ADX

# DeCurret

## 2. Interface optimized for mobile leveraged trading

Features that are frequently used in leveraged trading are displayed in the bottom menu for quick switching between windows to reduce the stress in leveraged trading.

<Frequently Used Features>

With a single tap, users can move from the chart window showing real time pricing to the trade, rate list and the fund status windows. The convenient app allows users to execute trades while keeping an eye on real time floating profit/loss on both the trade and rate windows.

### ■ How to download DeCurret App for Cryptocurrency Leveraged Trading

You can download the app Google Play.

## ■ Main risks when trading cryptocurrencies

- A cryptocurrency is neither a Japanese currency nor a foreign currency. The cryptocurrencies we handle are “decentralized cryptocurrencies” traded and issued over the internet, and their values are not guaranteed by any specific states or other parties.
- A cryptocurrency may lose significant value due to fluctuations in the price.
- Differences exist between buying and selling prices in cryptocurrency trades. During times of high market volatility or decreased liquidity, the differences between buying and selling prices may increase, the acceptance of orders may be interrupted, and so on. Customers may therefore be unable to complete transactions as intended.
- A cryptocurrency itself may lose all value due to breakdowns in the systems for transferring the cryptocurrency, or other reasons.
- Leveraged trading enables a customer to make transactions larger than the margin he/she has deposited with us. Thus while there is a possibility of significant profits, there is a corresponding risk of significant losses. Losses are not limited to, and may exceed, the value of the deposit. For details on margins, including the amount of margin required, how to calculate it, and the margin requirement rate, please visit our website.
- The order price displayed in the trade screen at the time the order was placed may differ from the actual contract price. It may be caused when it has taken long for our trading system to execute the order after it is received from the customer, as a result of communication issues between the device of the customer and our trading system, sudden changes in the price of the currency, etc. This may work to the customer’s advantage or disadvantage.
- Customers may be unable to complete transactions as intended, due to factors such as malfunctions of communication lines between the customers and the trading system or the cryptocurrency exchange operator.
