PRESS RELEASE

DeCurret to Start Offering an iOS App for Leveraged Trading

DeCurret Inc. (HQ: Chiyoda-ku, Tokyo, President & CEO: Kazuhiro Tokita) are pleased to announce that we started to offer an iOS app for leveraged trading (DeCurret App for Cryptocurrency Leveraged Trading) on Tuesday November 19, 2019.

* We are currently working on an app for Android.

1. **High-performance technical charts!**

In addition to the existing features for trading on a personal computer, the iOS app offers a wider collection of technical charts that allow you to perform multifaceted analysis of the prices of cryptocurrencies.

Landscape mode

- Charts can be viewed in landscape mode, covering a larger time span than a portrait view would cover. You can also zoom in and out of the charts.

Nine diverse indicators

- Nine indicators are offered for multifaceted price analysis, including not only those showing price movement, but also those signaling price momentum.

Overlays: Simple moving averages, Bollinger Bands, exponentially smoothed moving averages, and Ichimoku clouds (Ichimoku Kinko Hyo)

Oscillators: Stochastic oscillators, MACD, RCI, RSI, and DMI/ADX

DeCurret

Ample selections of time frames

- Tick charts and time charts with multiple time frames (M1, M5, M30, H1, H4, D1, W1 and MN1) are available so that you can watch the changes in price movements in greater detail.

2. Interface optimized for mobile leveraged trading

You can move with a single tap from the chart window that displays price movement in real time to the trade window. You also have a smooth access to the rate list and the fund status windows.

Quick switching between windows

- High-speed switching between windows reduces stress in leveraged trading.

Menu structure tailored to leveraged trading

- Features that are frequently used in leveraged trading* are placed in the bottom menu, and you can switch to the target window with a single tap.

Real time display of floating profit/loss

- You can make transactions while watching floating profit/loss in real time on both the trade and the rate windows.

Feature to save an order detail

- You can save an expected order volume for each currency as an order detail. With the “Speed ordering” method, you can trade quickly without entering the order volume every time you place an order.

DeCurret

Six menu items: Home, rates, trades, charts, fund status, and notifications

■ Main risks when trading cryptocurrencies

- A cryptocurrency is neither a Japanese currency nor a foreign currency. The cryptocurrencies we handle are “decentralized cryptocurrencies” traded and issued over the internet, and their values are not guaranteed by any specific states or other parties.
- A cryptocurrency may lose significant value due to fluctuations in the price.
- Differences exist between buying and selling prices in cryptocurrency trades. During times of high market volatility or decreased liquidity, the differences between buying and selling prices may increase, the acceptance of orders may be interrupted, and so on. Customers may therefore be unable to complete transactions as intended.
- A cryptocurrency itself may lose all value due to breakdowns in the systems for transferring the cryptocurrency, or other reasons.
- Leveraged trading enables a customer to make transactions larger than the margin he/she has deposited with us. Thus while there is a possibility of significant profits, there is a corresponding risk of significant losses. Losses are not limited to, and may exceed, the value of the deposit. For details on margins, including the amount of margin required, how to calculate it, and the margin requirement rate, please visit our website.
- The order price displayed in the trade screen at the time the order was placed may differ from the actual contract price. It may be caused when it has taken long for our trading system to execute the order after it is received from the customer, as a result of communication issues between the device of the customer and our trading system, sudden changes in the price of the currency, etc. This may work to the customer’s advantage or disadvantage.
- Customers may be unable to complete transactions as intended, due to factors such as malfunctions of communication lines between the customers and the trading system or the cryptocurrency exchange operator.
