"Hatsune Miku Logic Paint S" is a puzzle game in which players fill in squares using the numbers on the top and left of the grid as hints to complete the puzzle. The game is based on the previously released smartphone game app, "Hatsune Miku Logic Paint -MIKULOGI-" which was released in March 2020. The basic flow of the game in which players can collect various artworks of Miku and other Piapro Characters has been maintained, but the game is improved as the first ever Nintendo Switch game released from Crypton.

The main visual for the Nintendo Switch game is done by NEGI. Compared to the smartphone app, the Nintendo Switch version has more puzzles and artworks, as well as new features such as choosing your favorite character and clearing missions to unlock songs. Collect more artworks by solving puzzles in Miku and her friends' room while enjoying songs and the cute characters!
