▼What is "Hatsune Miku?"

Hatsune Miku is a music software developed by Crypton Future Media, INC., which enables anyone to make their computer sing by entering lyrics and melodies. As a massive number of users created music using the software and posted their works on the Internet, Hatsune Miku quickly evolved into a cultural phenomenon. Since then, Hatsune Miku has gained much attention as a character, involved in many fields such as merchandising and live performance as a virtual singer. Now her popularity has spread across the globe.

Our Business

We have more than 100 partners around the world, including the U.S. and Europe, and have licensed and sold more than 46 million pieces of sound software to the Japanese market. We started out as a "sound trading company" importing and selling audio materials such as sound effects, etc. Today, we are building and developing a wide range of services and technologies such as DTM software, sound delivery stores, music aggregators, 3D CGI systems, and smartphone game development, under a horizontal company structure. We are also known as the developer of the singing voice synthesis software "Hatsune Miku".
