

SUSTAINABLE DEVELOPMENT GOALS

Apartment Japan's Commitment to the SDGs

DID-GLOBAL Co., LTD. contributes to building a sustainable society through its foreigner-friendly rental platform, Apartment Japan®, and collaborations with partner companies. Our mission is to simultaneously address the challenges faced by foreign residents in Japan and the structural issues within Japan's housing market. Through these efforts, we are actively working toward the following SDGs.

SDGs 3. Good Health and Well-Being

To support foreign residents' access to healthcare, Apartment Japan introduces multilingual online medical consultation services. These include prescription support and emergency ambulance arrangements, helping to reduce anxiety caused by language barriers and differences in healthcare systems. By combining "Housing × Healthcare," we provide an environment where foreign residents can live with greater safety and peace of mind.

SDGs 10. Reduced Inequalities

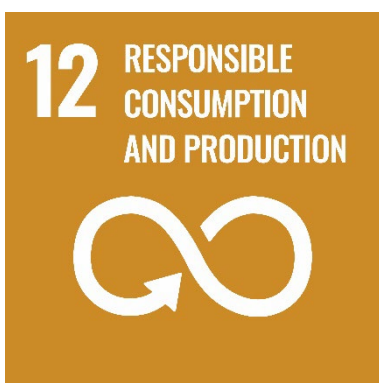

Foreign residents in Japan often face significant obstacles in securing housing, such as the requirement for guarantors, difficulties opening bank accounts, language barriers, and limited access to information. Apartment Japan addresses these challenges by offering an online property search and contract system that enables foreigners to rent more

easily, creating a fairer housing market environment where residents can secure housing on equal terms.

SDGs 11. Sustainable Cities and Communities

Japan's aging population and declining birthrate have accelerated the problems of vacant houses and apartments. Yet, many landlords hesitate to rent to foreigners due to concerns about language, lifestyle differences, and lack of management support.

Apartment Japan provides a platform that makes it possible for landlords to rent directly to foreigners, supporting everything from English property listings to online contract completion. By making vacant homes more accessible to foreign residents, we help revitalize communities and contribute to sustainable urban development.

SDGs 12. Responsible Consumption and Production

Due to visa restrictions, many foreign residents stay in Japan for short- to mid-term periods, leading to high demand for furnished rental properties.

Apartment Japan actively encourages landlords to provide furnished rentals and promotes the use of rental bedding.

This approach reduces the need for each new resident to purchase furniture and appliances, enabling the reuse and long-term utilization of existing resources. As a result, we help minimize waste and contribute to more sustainable consumption patterns.

SDGs 17. Partnerships for the Goals

Apartment Japan leverages strong partnerships with landlords and real estate companies across Japan to provide a wide range of property information in an accessible way for foreign residents. Through these collaborations, we not only share listings but also promote the creation of more foreigner-friendly housing and provide useful information for comfortable living.

In addition, by partnering with providers of coworking spaces, gyms and fitness platforms, online medical consultation services, housekeeping, and other lifestyle support services, we aim to deliver a one-stop solution that helps foreign residents live more comfortably in Japan.

【About Apartment Japan】

Apartment Japan and its premium site Apartment Japan-Luxe, operated by DID-GLOBAL, are rental portals offering properties designed for foreign residents under conditions such as mid-to-long-term stays (1 month+), no guarantor required, and credit card payment. Listings include furnished apartments, share houses, serviced apartments, and luxury residences. From pre-arrival searches to quotations, applications, e-signing, payment, and guarantee screening, all steps can be completed seamlessly online. Developed with support from the Small and Medium Enterprise Agency of Japan Government, the “Apartment Japan System” enables foreign residents to stay with peace of mind by easy contact to the landlords and property managers directly, especially when combined with the new APJ Support Service which is an interpretation call center service. Apartment Japan is Japan’s first dedicated DX rental platform specialized for foreign residents. Furthermore, Apartment Japan is expanding into integrated lifestyle services for foreign residents, including partnerships with coworking spaces, fitness platforms offering foreigner passes, and the APJ Support Service (providing initial inquiry handling with an English interpretation call center). By integrating “Healthcare,” “Work,” and “Housing,” Apartment Japan is expanding as a comprehensive lifestyle platform for foreign residents in Japan.

Conclusion

DID-GLOBAL Co., LTD. is committed to supporting the “Safety” and “Comfort” of foreign residents while addressing pressing social issues in Japan. Through Apartment Japan, we are creating solutions that span housing, healthcare, community development, and resource circulation—making meaningful contributions toward the achievement of the SDGs.
