Apartment Japan® Launches FLEX RENTALS: More Furnished Homes, Flexible Stays Across Japan

Four companies join forces to furnish homes by move-in and provide multilingual support.

DID-GLOBAL Co.,LTD., the developer and operator of Apartment Japan®, a rental platform specializing in housing for international residents, announces the launch of **FLEX RENTALS**, a new rental service developed in collaboration with three specialized partners — Teburade.com, Renxa, and iThinkRent.

By bringing together four companies with different areas of expertise, FLEX RENTALS aims to make renting and living in Japan easier, more flexible, and more comfortable for international residents, while opening up more housing choices across the country.

An Empty Room Today. A Furnished Home by Move-In!

Finding a furnished home in Japan isn't always easy. Most conventional rental properties come without furniture or appliances, while furnished monthly apartments can be expensive and limited in choice, particularly outside major cities.

Buying furniture and appliances in an unfamiliar country can be costly and time-consuming. Renting them separately isn't necessarily easier, either. Furniture rental providers have often required a Japanese contact person, a Japanese bank account, or full advance payment for the entire rental period.

FLEX RENTALS offers a new solution.

With flexible lease terms, even properties listed without furniture can be furnished before move-in, with furniture and appliances arranged after the rental agreement is confirmed.

This innovative approach enables **landlords and property companies across Japan to offer more of their existing properties as furnished homes**, potentially at more affordable prices than conventional furnished monthly rentals.

Through Apartment Japan, these landlords and property companies can list their properties directly, bringing a wider range of housing options to international residents — not only in Tokyo and Osaka, but throughout Japan.

For tenants, this means more opportunities to find a home that matches their budget, preferred location, and length of stay, without the hassle of buying or arranging furniture themselves.

Look for the "FLEX RENTALS" label on Apartment Japan!

You may see photos of empty rooms in search results, but don't worry — furniture and appliances can be ready when you move in!

On the property detail page, simply watch the furniture and appliance preview video to imagine your future furnished home. You can also check the specific furniture and appliances included in the property details.

Four Companies, One Easier Rental Experience

FLEX RENTALS offers much more than flexible lease terms and furnished homes. Four specialized companies work together to make renting and living in Japan more convenient and reassuring.

- **Apartment Japan — Find, Apply, and Rent Online:** Search for homes, get instant quotes, apply, sign contracts, and pay online in English. For properties supporting online contracts, no guarantor or Japanese bank account is required, and internationally issued credit cards are accepted.
- **Teburade.com — Furniture Ready for Your Stay:** Provides furniture and appliances, arranging installation before move-in and removal after move-out, so you don't have to worry about buying, moving, or disposing of them.
- **Renxa — Multilingual Living Support:** Helps residents with everyday questions and concerns during their stay, as well as utility arrangements for electricity, gas, and water.
- **iThinkRent — Convenient Payments and 24/7 Emergency Assistance:** Supports rent payments using internationally issued credit cards and provides 24/7 multilingual emergency assistance.

Even if your landlord doesn't speak your language, you can enjoy greater peace of mind with multilingual living support and 24/7 emergency assistance throughout your stay.

This combination of services helps make more rental properties accessible to international residents, even when the landlords themselves are not experienced in serving foreign tenants.

Whether you're an Assistant Language Teacher (ALT), an international professional, a digital nomad, a student, or simply someone dreaming of living in Japan, FLEX RENTALS aims to open up more housing possibilities.

From major cities to smaller towns and regional communities, you may soon have more opportunities to find a furnished home that fits your lifestyle — for a few months, a year, or longer.

Created from Experience. Designed for Your Life in Japan.

For more than 15 years, DID-GLOBAL has operated rental housing for international residents in Japan, working directly with tenants and

experiencing firsthand the challenges they face in finding and renting a home.

We have welcomed people from different countries, with different lifestyles, plans, and lengths of stay. Through those experiences, we came to understand that finding the right home in Japan isn't just about location or rent. It's also about flexibility, convenience, and having someone to turn to when you need help.

That experience inspired us to develop Apartment Japan — a rental platform designed to make finding and renting a home in Japan easier for international residents.

FLEX RENTALS is another step in that journey.

By developing new services and collaborating with specialized partners, we're working to make more homes across Japan accessible to international residents, with rental arrangements that better suit their needs.

Our goal is simple: to help more people find a home where they want to live in Japan, with the flexibility and peace of mind they deserve.

More homes. More flexibility. More peace of mind.

Your home in Japan. Your way.

Planning to live in Japan, or know someone who is? Discover more housing possibilities with Apartment Japan!

Lease terms, rental prices, furniture and appliances, and available services vary by property. Online contracting is available for eligible properties.

About Apartment Japan

Apartment Japan® is a rental platform developed and operated by DID-GLOBAL Co.,LTD., specializing in housing for international residents in Japan.

Landlords, real estate companies, and property management companies across Japan list their rental properties directly on the platform, offering a wide range of housing options for stays starting from one month.

For properties supporting online contracts, users can complete the entire process from property search and instant quotation to application, electronic signature, and credit card payment through the website.
