Staking is a mechanism that allows users to receive crypto assets in exchange for contributing to the generation of crypto assets and the stable operation of the blockchain. Financie regularly records transaction history on the Ethereum blockchain to ensure the transparency and the value of the Community Token* issued and used on the blockchain-based token-issuing crowdfunding service FiNANCiE. In Staking, which will be launched in Spring 2023, users can participate by locking FNCT with a validator (a processor that verifies and approves data) and will receive FNCT in return. The detailed method of participation and rewards for staking will be announced later.

*Community Token is NOT a crypto asset. It can be used only in FiNANCiE service.

■Details of the sales results

Total application amount	JPY 20,021,288,100 (USD 150m)
Application Rate (Total application amount / Total amount sold)	18.78x
Number of accounts applied	24,833 accounts
Total amount sold	JPY 1,066,000,000 (USD 8.0m)

The funds raised (approximately JPY 1.066 billion) will be used for the further development of FNCT, and the expansion and revitalization of the FNCT ecosystem.
