

**Brand New Puzzle Game “Hatsune Miku Connecting Puzzle TAMAGOTORI”
Available on Nintendo Switch from Jan. 27th, 2022!**

Crypton Future Media, INC. (Head Office: Sapporo, Hokkaido, Japan; CEO: Hiroyuki Itoh) has released its original video game “Hatsune Miku Connecting Puzzle TAMAGOTORI” for Nintendo Switch on Thursday, January 27th, 2022. The puzzle game is a download-only software and will be available for purchase on the Nintendo eShop. In celebration of the release, a limited time launch sale will make the game available for 20% off until Feb. 6th.

In “Hatsune Miku Connecting Puzzle TAMAGOTORI,” players connect eggs of the same pattern with a line that bends twice or less to clear the eggs. When all of the eggs are cleared, the stage is completed and the player can reveal 1 illustration panel. Revealing 25 panels will complete the illustration for the player to enjoy, and the game has a total of 200 stages.

Additionally, players can use Berries found while solving puzzles to gather birds based on the Piapro Characters. Over 150 types of birds are in the game and are cataloged in the game’s gallery. Clear lots of eggs to earn Rare Berries and aim to meet all the birds!

The main visual for “Hatsune Miku Connecting Puzzle TAMAGOTORI” is by the illustrator Choke. Additionally, 5 songs chosen from a public collaboration are included as BGM tracks. Enjoy the new music featuring Hatsune Miku and friends in this second Nintendo Switch puzzle game from Crypton Future Media.

Our Business

We have more than 100 partners around the world, including the U.S. and Europe, and have licensed and sold more than 30 million pieces of sound software to the Japanese market. We started out as a "sound trading company" importing and selling audio materials such as sound effects, etc. Today, we are building and developing a wide range of services and technologies such as DTM software, sound delivery stores, music aggregators, 3D CGI systems, and smartphone game development, under a horizontal company structure. We are also known as the developer of the singing voice synthesis software "Hatsune Miku".
