**New puzzle game “Hatsune Miku Logic Paint S+” on sale from July 24th!
Simultaneous Worldwide Release for Switch, PS4/PS5, Xbox and Steam!**

Crypton Future Media, INC. (Head Office: Sapporo, Hokkaido, Japan; CEO: Hiroyuki Itoh, hereafter “Crypton”) will be releasing a new puzzle game “Hatsune Miku Logic Paint S+” on July 24th, 2025 (Thurs.). This title is a powered up version of a previous title “Hatsune Miku Logic Paint S,” released in 2021 for Nintendo Switch™. In addition to more than 1000 puzzles to solve with the “Piapro Characters” (“Hatsune Miku,” “Kagamine Rin,” “Kagamine Len,” “Megurine Luka,” “MEIKO” and “KAITO”), the game also includes more than 30 new artworks and new features where players can freely customize room items and character costumes. This title will be released simultaneously worldwide on Nintendo Switch™, Xbox One, PlayStation®4/ PlayStation®5 and Steam.

“Hatsune Miku Logic Paint S+” Website: https://www.crypton.co.jp/games/Hatsune_Miku_Logic_Paint_Splus

“Hatsune Miku Logic Paint S+” (abbreviated as: “MIKULOGI S+”) is a puzzle game in which players fill in squares using the numbers on the top and left of the grid as hints to complete the puzzle. The main visual is drawn by illustrator NEGI, who has also drawn the main visual for the previous title “Hatsune Miku Logic Paint S.” In addition, as part of an effort to support creators, 30 songs selected from a song contest held on Crypton’s content sharing platform “piapro” are included in the game as BGM.

Furthermore, in consideration of increasing demand for streaming content such as gameplay streaming, we designed the game so that it is not only fun to play, but also fun to watch on streams. Please refer to the “Guidelines for live streaming, and posting of videos / images” (Japanese only) to enjoy streaming.

Our Business

We have more than 100 partners around the world, including the U.S. and Europe, and have licensed and sold more than 30 million pieces of sound software to the Japanese market. We started out as a “sound trading company” importing and selling audio materials such as sound effects, etc. Today, we are building and developing a wide range of services and technologies such as DTM software, sound delivery stores, music aggregators, 3D CGI systems, and smartphone game development, under a horizontal company structure. We are also known as the developer of the singing voice synthesis software “Hatsune Miku”.
